Pumps, for the Now Common Diesel

Company introduces new all-makes program of Direct Injection Diesel Pumps

Fuel Parts UK, a leading manufacturer and supplier of fuel and emissions components, has announced the introduction of a new all-makes range of Common Rail Diesel Injection Pumps.

The Bromsgrove-based company has been involved in the diesel injection market for many years, supplying Injectors, Vacuum Pumps, Solenoids and EGR Valves. With the increased percentage of diesel vehicles in the UK vehicle parc and the transfer to common rail injection systems, Fuel Parts UK have introduced new catalogues which include Engine Management products for these engines. Their Diesel products range now includes; Lambda Sensors, Cam/Crank & Knock Sensors, Mass Air Flow Meters, Air/Coolant & MAP Sensors.

Fuel Parts UK managing director, Andy West, said: "This new range of direct injection diesel pumps gives our customers first-rate coverage in this growing market. As always we have made our catalogue easy to use, with accurate vehicle applications, also listing engine details and O.E references. This ensures they supply the right part, first time."

This new product line of Diesel Pumps consists of over 100 part numbers covering over a thousand vehicle applications. Exchange units are available off the shelf with overnight delivery and suit Bosch, Siemens and Delphi, Common Rail Diesel applications.
