## **FPUK's Cat Revolution – Euro 4 Developments**

*Company is the best placed aftermarket supplier for  
Euro 4 Type Approved Catalytic Converters.*

Fuel Parts UK, a leading manufacturer and supplier of fuel and emissions components, has extended its range of Catalytic Converters to include many parts that meet Euro 4 emission standards. The rate of development has been immense during the first quarter of 2010 and with the introduction of over 100 new references, including many Euro 4 applications the company ensures quality and emission standards are high on the agenda.

The Bromsgrove-based company ensures all of its converters fully comply with the new type approval regulations. The premium range of Catalysts were originally designed to solve common “light on” issues and currently offers the market a quality choice with a fit and forget attitude. Now Fuel Parts UK are the only company offering a fully approved Euro 4 compliant range.

Additional part numbers are being added weekly to offer the most comprehensive range of Euro 4 approved converters from one source. The latest applications in include FIAT Bravo 2007 onwards, FIAT Scudo 2007 onwards and Volkswagen Eos 2006 onwards.

Fuel Parts UK managing director, Andy West, said: “We continue our aggressive development programme on Catalytic Converters and are now the best placed converter supplier in the aftermarket for Euro 4, giving our customers the assurance and guarantee that the products we supply meet emission standards regulations. Our complete range of converters now tops over 1900 part numbers covering 12,000 vehicle applications.”
