

PRESS RELEASE

Diesel Developments from Fuel Parts UK

Company launches brand-new printed Diesel Components Catalogue

Fuel Parts UK, a market-leading manufacturer and supplier of fuel and emissions components, has taken the wraps off its brand-new printed diesel catalogue, giving 85% plus coverage of the UK vehicle parc.

The new 123-page catalogue features Fuel Parts UK's new all-makes range of Common Rail Diesel Injection pumps, plus Engine Management components, Hand Primers, Lift Pumps, Injectors, Vacuum Pumps and much more. The catalogue lists a total of over 500 part numbers coupled with over 4000 applications and features bespoke product sections that will be invaluable to stockists and technicians alike as they explain what certain products do, their failure symptoms and what service maintenance is required when this happens.

Fuel Parts UK managing director, Andy West, said: "Our wide range of diesel components gives our customers first-rate coverage in this growing market. As always we have made our catalogue easy to use, with accurate vehicle applications also listing engine details. This ensures the right part, first time."

Fuel Parts UK have a dedicated team that invest a great deal of time and energy, to regularly finding new references and suitable manufacturing partners. The latest developments include diesel injectors for BMW 318D and Mercedes Sprinter and Diesel Pumps for Ford Transit, Renault Clio, Kangoo and Modus. To keep up to date with new products, visit the company's website at www.fbuk.co.uk.

To obtain a copy of the new Fuel Parts UK printed diesel catalogue, professionals are asked to either contact Sue, Amanda or Anneliese on 01527 839344 or email salesadmin@fbuk.co.uk.
