Fuel Parts UK Expansion

New warehouse due to extensive product development at Fuel Parts UK.

Fuel Parts UK, a leading supplier of premium fuel and emissions components, has acquired new warehouse premises after an extensive product development programme.

The Bromsgrove based company now occupies six units on the Buntsford Hill Business estate, the extra space was deemed necessary due to rapid product development and plans to launch some new exciting product ranges.

Jason Stirling, product development manager said: "Over the past two years, we have added more than 800 new part numbers to our engine management catalogue alone, with additional warehouse capacity we can ensure we can keep a larger stock holding, meaning better availability for our customers".

The new unit six has meant the restructuring of existing warehouses to provide more efficient systems and a faster pick-rate for the most popular part numbers. Jason continued: "Watch this space for new Product ranges from Fuel Parts UK".
