PRESS RELEASE

Vehicle Management from Fuel Parts UK

Company launches brand-new Vehicle Management Catalogue

Fuel Parts UK, a market-leading manufacturer and supplier of fuel and emissions components, has taken the wraps off its brand-new vehicle management catalogue, giving 85% plus coverage of the UK vehicle parc.

The new 423-page catalogue features Fuel Parts UK's new all-makes range of Brake Light, Door Light, Oil Pressure, Radiator Fan and Reverse Light Switches plus a range of temperature sensors. The catalogue lists a total of over 650 part numbers coupled with over 20,000 applications and features bespoke product sections that will be invaluable to stockists and technicians alike as they explain what certain products do, their failure symptoms and what service maintenance is required when this happens.

Fuel Parts UK managing director, Andy West, said: “Our wide range of vehicle management components give our customers first-rate coverage in this growing market. As always we have made our catalogue easy to use, with accurate vehicle applications also listing engine details. This ensures the right part, first time.”

The complete catalogue is available online at www.fpukfindapart.co.uk which includes all the new latest developments. Alternatively to obtain a copy of the printed catalogue, professionals are asked to either contact Olivia or Sue on 01527 839344 or email salesadmin@fpuk.co.uk.

Fuel Parts UK have a dedicated team that invest a great deal of time and energy, to regularly finding new references and suitable manufacturing partners. The latest developments include a range of switches for Chrysler 300C and PT Cruiser. To keep up to date with new products, visit the company's website at www.fpuk.co.uk.
