UFI FILTERS Group

UFI FILTERS spa is Europe's most important private manufacturer of filters and has been operating in the international automotive sector since 1972.

Our success has been built on solid principles that are a leitmotif throughout our history:

- *be ahead of the times* and constantly propose new and innovative projects to our customers.
- *keep in contact* with new market trends so as to continue to be an active partner for vehicle manufacturers and for the chain of distribution.
- *know how to harvest* opportunities and transform them into global competitiveness.
- *focus on human resources* so as to keep motivation high and meet the most difficult challenges.
- *maintain close contacts* with our customers and be able to promptly meet their requirements.

UFI FILTERS Group

Today **UFI FILTERS** does business throughout the world through a network that covers all the worldwide strategic commercial and production areas.

UFI FILTERS relies on the collaboration of more than 2,300 employees. Almost 5% of these are engineers and product specialists committed in research and development.

UFI FILTERS Group

Our group has various divisions present on the market, each working independently and meeting the specific requirements of their own customers.

An increasing number of manufacturers choose us to be their supplier of original equipment, testifying to the excellent reputation we enjoy on the market.

Every day we add new customers to those who have chosen UFI FILTERS quality and service. Here are a few of the brands we work with...

Types of products

UFI FILTERS ensures the best quality standards and leading-edge technological know-how for all product families (air, oil, fuel and cabin air) destined both for the OE market and the Aftermarket, all featuring the same technical-manufacturing characteristics.

Oil filters

Cabin air filters

Complete air filters

Fuel filters

UFI in the Aftermarket

UFI FILTERS operates with two brands in the Aftermarket:

UFI and SOFIMA products are all made with the same know-how, the same materials and the same technology that is applied to OE manufacturing.

UFI and SOFIMA deal with and work day by day in absolute independence. UFI and SOFIMA differ, in addition to packaging and coding, in their different market approach and in a customized marketing program that aim at capitalizing on their distinctive characteristics.

The Aftermarket Business Unit approaches the market with tailored solutions for each single customer.

UFI in the Aftermarket

Every day the Aftermarket Team confronts market challenges in partnership with its own distribution network, striving to grow profitably together.

Our strong points are:

MARKETING

innovative and multilevel

WORK TOOLS

updated in real time

LOGISTICS

CUSTOMER CONTACTS

FLEXIBILITY

and market knowledge

RANGE

meeting the requirements of every market

UFI in the Aftermarket

This section illustrates several of the main products in the UFI and SOFIMA range. Quality, materials and manufacturing technology are the same as in our original equipment products.
